

Artificial Grass Can Help Reduce the Risk of Leptospirosis

Published: March 24, 2017 - [Watersavers Turf](#)

In [recent news](#), you may have heard about Leptospirosis (Lepto), and how dogs have contracted this by drinking from pools of standing water infested with the bacteria, *Leptospira*. Some dogs have even died. At [Watersavers Turf](#), a premier distributor of synthetic turf, our artificial grass can help reduce the risk of Leptospirosis. Since artificial grass drains quickly, there are no worries of heavy rains causing water puddles where your dog could encounter Lepto. Artificial grass can help reduce the risk of Leptospirosis for even you and your family because it can be passed to humans. Not only does artificial grass help reduce the risk of Leptospirosis, but it can also prevent your yard from becoming a muddy mess or a brown-green dirt patch after harsh weather. When you install faux turf, you can avoid the labor and cost of having to reseed or even tear out your live lawn. There are some other very good reasons for you install faux turf.

Why Synthetic Turf Lawn Replacement Makes Good Sense

Why does synthetic turf lawn replacement make sense for the way you live? Well, it can save on three key things in your life: money, time, and water. It never needs to be watered, fertilized, or reseeded. Plus, since a synthetic turf lawn replacement drains away heavy rainfall and withstands drought conditions, it looks great even after harsh weather conditions. Synthetic turf lawn replacement makes good sense cost-wise, too.

Let's talk about the money that you can save. To compare the yearly costs of real sod vs. fake, take a look at this [chart](#). Also, think about the savings on the cost of the water that your new faux lawn will no longer need. You'll also save yourself endless hours of yard work, making your lawn a place to relax in and enjoy. No more worries about weeds and yard pests. Upkeep is simple as raking or brooming it from time to time.

All Our Fake Grass Products Are Safe for Kids and Pets

Not only does our fake grass look great, as you'll see in our [catalogue](#), it feels great, too. Use our fake grass lawn cushions to make your yard into a comfy, safe, and fun play area for your kids. Since our fake grass drains fast, you and your family will be able to use your yard more often. If there are dogs in your family, check out our [Flo-Rite-Thru](#) pet grass. It will keep the pet areas of your new yard clean, green, and free from odors.

All our fake grass products are certified non-toxic and lead-free. They hold up well to weather damage and heavy use. That is why you see synthetic grass not only in private yards, but also at schools, businesses, sports fields, and in many other public areas.

Why You're Seeing More Artificial Lawn Being Used

Artificial lawn is now used in more places than ever. It's always been a smart choice for sports fields because it lowers the risk for injury and reduces weather delays. Today, its uses seem to keep growing. Cafes use it to create outdoor dining areas. It can be found in city playgrounds and on roof top patios. Businesses choose it for the instant curb appeal of its lush green look, and its easy care. Artificial lawn never needs watering or mowing, so it is also good for our planet.

Our many styles at Watersavers Turf have come a very long way from the limited choices of years past. People use our turf for lawns, putting greens, pet runs and more. You can find new ideas for using artificial lawn by visiting our [online gallery](#).
