

Artificial Grass Lawn Replacement—an Eco-Friendly Choice

Published: September 25, 2017 - [Watersavers Turf](#)

Looking for a way to reduce your bills while also helping the planet? An artificial grass lawn replacement is an eco-friendly choice for any property owner. At [Watersavers Turf](#), we're happy to explain how replacing your live grass lawn with our products is good for the environment. What makes an artificial grass lawn replacement an eco-friendly choice? There are many answers to that question. For one, you don't have to water this type of lawn. The average homeowner that owns one conserves up to 30,000 gallons of water each year. That's just one of many reasons why an artificial grass lawn replacement is an eco-friendly choice.

Less pollution is another. Gas mowers and lawn care tools increase your carbon footprint. Luckily, you don't have to mow a synthetic lawn. You also don't need to fertilize it. This prevents groundwater pollution.

We're all starting to realize how important it is to keep our planet safe. You can do your part with a faux lawn that does less harm to the environment than real grass.

Replacing Your Lawn with Artificial Grass

If you've never thought about replacing your lawn with artificial grass, you might have some questions. What are the pros and cons? Is replacing your lawn with artificial grass costly? Is the material safe? What type of upkeep is involved? That said, the more you learn about replacing your lawn with artificial grass, the easier it is to realize why this is such a smart choice.

Regarding cost, making the switch will help you save money in the long run. Not having to water, fertilize, reseed, or mow your lawn which saves time and money. To learn about the cost of installation, visit us online for a [free estimate](#). Our website provides plenty of useful info about these products.

To add to your peace of mind, we offer an 18-year residential use warranty (10 years for commercial use). Our turf is even certified non-toxic and lead-free. We also test for fire resistance, UV resistance, and yarn wear & tear. Our products are top-quality, and we stand by them.

Artificial Turf is a Great Lawn Alternative

Artificial turf is a great lawn alternative for many reasons. It stays green and vibrant all year long, for one. Safety is another reason artificial turf is a great lawn alternative. You can also add lawn padding beneath them. This is ideal if you have children who like to play in the yard. On top of that, artificial turf is a great lawn alternative because it requires very little upkeep. That means you have time to enjoy your yard for once.
